

BLMK Shared Care Record Portal guide (Community)

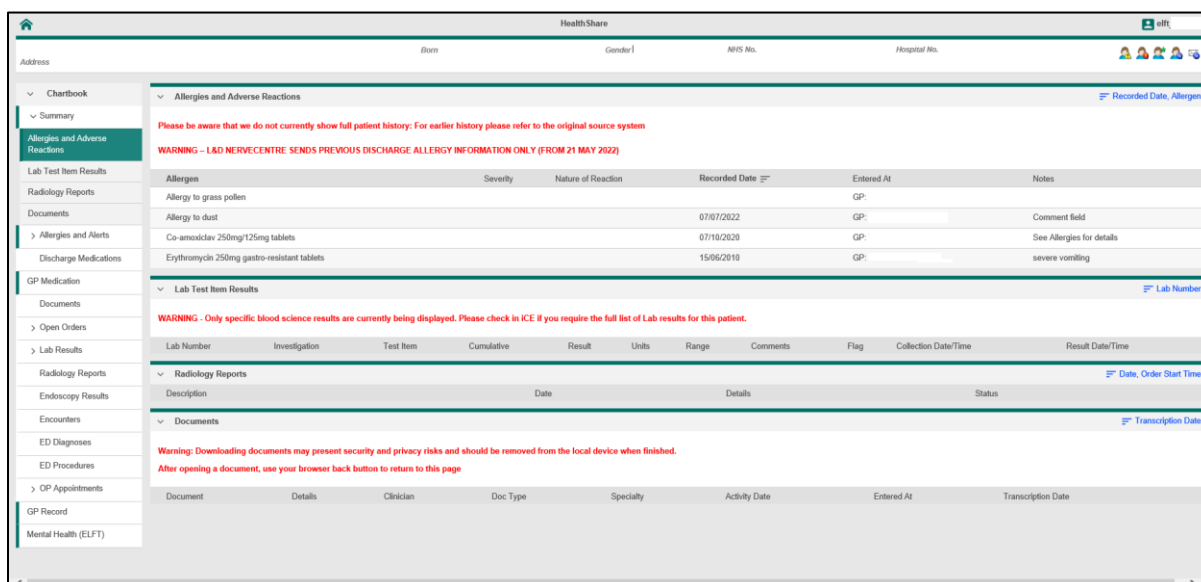

Version 3.0

Accessing the BLMK Shared Care Record Portal via SystemOne

Firstly, retrieve the patient from within SystemOne. You will then be able to access the BLMK Shared Care Record by clicking on the link shown below:

When you click on the link, the BLMK Shared Care Record will open in a new window as shown below. The patient you retrieved in SystemOne will be the patient whose Shared Care Record will launch in this window:

BLMK Shared Care Record Portal guide (Community)

Version 3.0

What can be accessed and what does it look like?

The Portal will return the information on your retrieved patient from SystemOne and the landing page will look as below. You will see there are a number of areas down the left-hand side. A green highlight shown on the left of the tab indicates that there is relevant information about your patient available to view in that section. If there is no green highlight, there is no information to view, i.e. in the example shown below, information exists in Summary, Allergies and Alerts, GP Medication, GP Record and Mental Health but not in Documents, Open Orders, Lab Results, etc.

The screenshot shows the BLMK Shared Care Record Portal interface. The top navigation bar includes fields for Address, Birth, Gender, NHS No., and Hospital No. The left-hand side features a vertical menu with tabs: Chartbook, Summary, Allergies and Adverse Reactions (highlighted in green), Lab Test Item Results, Radiology Reports, Documents, Allergies and Alerts, Discharge Medications, GP Medication, Documents, Open Orders, Lab Results, Radiology Reports, Endoscopy Results, Encounters, ED Diagnoses, ED Procedures, OP Appointments, GP Record, and Mental Health (ELFT). Red arrows point to the 'Allergies and Adverse Reactions', 'GP Medication', 'GP Record', and 'Mental Health (ELFT)' tabs.

The main content area displays the 'Allergies and Adverse Reactions' section. It includes a warning: "Please be aware that we do not currently show full patient history: For earlier history please refer to the original source system" and "WARNING - L&D NERVECENTRE SENDS PREVIOUS DISCHARGE ALLERGY INFORMATION ONLY (FROM 21 MAY 2022)". Below this is a table with columns: Allergen, Severity, Nature of Reaction, Recorded Date, Entered At, and Notes. The table contains three entries:

Allergen	Severity	Nature of Reaction	Recorded Date	Entered At	Notes
Allergy to grass pollen				GP:	
Allergy to dust			07/07/2022	GP:	Comment field
Co-amoxiclav 250mg/125mg tablets			07/10/2020	GP:	See Allergies for details

Below the table is the 'Lab Test Item Results' section, which includes a warning: "WARNING - Only specific blood science results are currently being displayed. Please check in ICE if you require the full list of Lab results for this patient." It features a table with columns: Lab Number, Investigation, Test Item, Cumulative, Result, Units, Range, Comments, Flag, Collection Date/Time, and Result Date/Time.

The 'Radiology Reports' section includes a table with columns: Description, Date, Details, and Status.

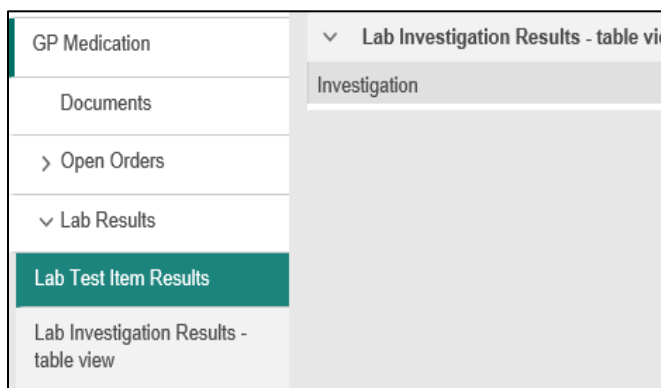

The 'Documents' section includes a warning: "Warning: Downloading documents may present security and privacy risks and should be removed from the local device when finished. After opening a document, use your browser back button to return to this page" and a table with columns: Document, Details, Clinician, Doc Type, Specialty, Activity Date, Entered At, and Transcription Date.

Chartbook
Summary
Allergies and Alerts
Discharge Medications
GP Medication
Documents
Open Orders
Lab Results
Radiology Reports
Endoscopy Results

Observations
Encounters
Administrative Items
Referrals
Immunisations

ELFT Mental Health Records

Community Health staff will be able to access ELFT Mental Health (RiO) information from the Mental Health tab at the bottom of the list:

Exiting the ShCR

When you have finished using the portal, please remember to close the window by clicking on the X in the top right-hand corner.

The system is designed to time out after 120 seconds of inactivity so that the patients record is not left open. If this happens, you will see the screen below:
