

ARE YOU IN A CRISIS?

The information in this leaflet may help you understand some of your feelings and details who to contact if you are experiencing suicidal thoughts or if you are at risk of hurting yourself or others

Introduction

For some people, coming to see a therapist for the first time can be a great relief. They think at last they are getting help with a difficult problem and feel hopeful.

For others it can raise a lot of difficult and painful thoughts and feelings that they may have tried to avoid. When this happens people can sometimes feel hopeless.

What else can I do?

When you feel quite desperate or hopeless, it may be because you are stuck in a rut of repeated thoughts and/or actions. Just doing something small to change this pattern can help.

Try doing something you've enjoyed in the past, something like :-

- * taking a short walk to get some fresh air
- * listening to a favourite piece of music

Just 10 minutes or so, just to see if you feel any better.

Can family of close friends help?

For some people, talking with friends and/or family can help. If you have a close family member or a friend you get on well with, they might be the best person to turn to if you finding yourself unable to cope.

Emergency Contact Details

You might not want to talk to a family member or close friend about things that are so very difficult and/or personal.

If this is the case and you are struggling, you could try one of the following help lines:

Samaritans: 116 123
