

# L6 PHYSIOTHERAPIST APPRENTICESHIP

University of  
East London

Pioneering Futures Since 1898

## OVERVIEW

Our Physio Apprenticeship runs across 4 years and mirrors the undergraduate full-time degree. As an apprentice, you will spend approximately 30% of your time doing 'off the job' training. This means that you will spend time on day release at UEL where you will attend lectures, tutorials, and practical classes. The rest of your time you will spend working for your employer, integrating and assimilating what you have learnt at University and includes periods of assessed clinical practice.

Apprentices will be supported by the course leader who manages the learning and teaching and co-ordinates with a mentor based in the trust. Both academic and pastoral support is provided. We recognize that an apprenticeship course can be demanding. UEL has a long history of supporting mature students to achieve a higher education degree. For this reason, additional support is available to apprentices through our student HUB, skillzone and the centre for student success.

## ASSESSMENT

On the apprenticeship you will complete the same modules and undertake the same assessments as the full-time course. All of our allied health degree apprenticeship courses are professional registrations that will allow you to be eligible to apply to the relevant body for entry onto their professional register.

## ENTRY REQUIREMENTS

Employer support and commitment to undertake the programme

- Evidence of level 3 study or equivalent
- Maths and English GCSE Grade C or above or Functional Skills Level 2 (or equivalent)
