## EPMA MAC Guide CMM v8

cmm epma mac guide - printing paper chart for emergency (part 1) v1.2 22.07.2024

## **Medicines Administration Chart (MAC) Guide**

The MAC report will create a paper copy of the medication chart showing you what is due in the next 7 days of treatment and can be used to manually record medication administrations in the event the EPMA system goes offline. The need to print paper charts may arise due to a number of reasons such as external request for information, transferring a patient to a ward that is yet to have EPMA deployed, the transfer of a patient to a General Hospital, or the EPMA system goes offline.

Log on to EPMA using the desktop icon below using your username and password.

From the home screen below, click on the **REPORTING** option.

You need to ensure you **Select** the **MAC** option on the **TOP LEFT** side of the screen.

Once your ward has been selected, press **PRINT REPORT** on the bottom RIGHT of the screen.

You will have all the patients' **MEDICATION ADMINISTRATION CHARTS** for your selected ward ready to **PRINT**. Select the print option to print or save option if you wish to save the charts as a PDF file.
