East London NHS Foundation Trust

## Prescribing a medicine not available on EPMA User Guide CMM v8

Prescribing a medicine not available on EPMA v1.4

## Prescribing a medicine that is not available on EPMA

• Locate the 'Inpatient Rx' tab on the patient's profile and select 'ADD DRUG' in the top left-hand corner as shown in the screenshot below.

TEST, Testma	an				Born 26-Mar-1985 (39 y)	) (	Gender Male	Ná	ational N	0.

- Search for the medication you are trying to find. Ensure you have the correct spelling and note you don't have to spell out the whole name of the medication. You can try the generic and brand name. Most medication on the system will be found as their generic name but there are some that may come up with brand name.
- For example, if searching for paracetamol you can search 'para' and you will be presented with all the available medications starting with 'para'.
- If you cannot find the medication you are looking for, you will be presented with a screen that looks like the below.

eatment Search						
	Q There were 0 drugs found	i.				
Drug Protocol Infusion						
madeupdrug	Search	<u>Clear</u>	Show all	Help	More search options	

- If this occurs <u>during</u> working hours, please contact your ward pharmacist who will liaise with the EPMA Team and add the drug onto the system.
- If this occurs <u>outside</u> of working hours, you will need to prescribe using the dummy drug '\*Medicine not on EPMA'. This will appear as shown in the screenshot below.

Treatment Search		x

	Cancel	Next

- Please note when prescribing \*Medicine not on EPMA the system won't be able to identify whether this medication interacts with any of the other medication prescribed for this patient.
- Interactions will need to be checked manually by the prescriber to ensure safety.
- Once interactions have been checked, click on 'Next' to proceed.

- In the title, please populate the **name**, **dose**, **formulation** and **frequency** of the drug.
- You will then need to select **'Note to appear when charting'** in the 'type' field to ensure this information is presented to nursing staff during administration so they know which medication to administer to the patient.
- The nurse administering this medication will be required to acknowledge this 'order note' before they're able to proceed so it's important this information is clear and accurate.
- Further information can be detailed in the text e.g. Patient has brought in their own supply.
- Select the 'Suppress on Order Stop / discontinue' tick box to suppress this note when '\*Medicine not on EPMA' is discontinued.
- Click on 'Save' once completed.
- Once the 'order note' has been saved, the user will be taken back to the 'Order Entry' screen.

- Complete the 'Order Entry' section ensuring the details are correct, most importantly that the frequency matches that in the 'order note' and that a dose is entered.
- Be mindful that the 'Dose' will always be set to 'units' and cannot be changed.
- See below for an example which matches the 'order note' on the previous page.
- Click 'Next' when ready to proceed.
