Original Request FOI DA5642:

Question 1: How many of your patients with one or more diagnosed mental health disorders are also diagnosed with Coeliac Disease?

Could I please have a data set of 10 years if possible? If not then 5 years or fewer years is also fine, or let me know what your capacity would be.

Answer: A total of 37 patients have been diagnosed with Coeliac Disease in the last 10 years since October 2014.

Question 2: If possible, I would also like to know what these mental health conditions are, so could you please also provide a breakdown of these diagnoses (of course not with any identifiable patient information).

Could I please have a data set of 10 years if possible? If not then 5 years or fewer years is also fine, or let me know what your capacity would be.
