# Objectives of the workshop

- Explore the key behaviours in leading for improvement
- Consider how to integrate improvement with operations and finance
- Identify ways to engage clinicians in improvement

Let's get to know each other

The PIP is built on six themes for IMMEDIATE action:

**inspiring  
improvement**  
#improve365

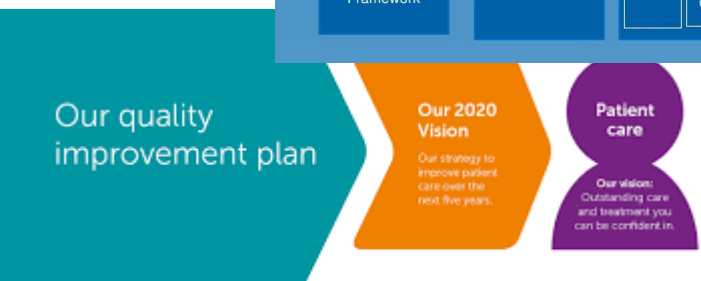

Plus, working within existing recovery plans

By engaging with staff at the Ask and Act workshops the Preliminary Improvement Plan will

grow in Quality Imp

First, let's define what we mean by...  
**Quality improvement**

**Improving Quality**  
**NHS**

improving  
quality

≠

quality  
improvement

# So, what are the **key components** in leading continuously improving organisations?

What would others see in our behaviours?

What is our approach to problem-solving?

What would others experience and feel in their interactions with us?

Use of data to guide decision-making

Stop solving problems at the top

Give people time and space to solve complex problems

Change in leadership behaviours

Paying personal attention

Manage the expectations

**ROLE MODELLING**

The image features a circular graphic with a red and orange gradient background. Inside the circle, there is a globe with a textured, slightly grainy appearance. The text "WHAT MATTERS MOST" is written in bold, yellow, sans-serif capital letters across the center of the globe. The text is slightly shadowed, giving it a 3D effect as if it's floating or attached to the globe. The overall aesthetic is modern and impactful, with a strong color palette of red, orange, and yellow.

**WHAT  
MATTERS  
MOST**

1. Create the right context for continuous quality improvement

2. Build capability and capacity

3. Inspire and empower people to lead improvement

4. Create an infrastructure to support improvement

5. Align the work around improvement priorities  
– clear priorities, stop other stuff, redesign systems built for assurance

6. Constancy of purpose  
– relentless focus, shield teams from distractions

### Driven by Persons and Community

- Include patients on improvement teams
- Start meetings with patient stories and experience data
- Use leadership rounds to model engagement with patients and families

### Develop Capability

- Teach basic improvement at all levels
- Invest in needed infrastructure and resources
- Integrate improvement with daily work at all levels

### Shape Culture

- Communicate and model desired behaviors
- Target leadership systems and organizational policies with desired culture
- Take swift and consistent actions against undesired behaviors

### Create Vision and Build Will

- Boards adopt and review system-level aims, measures, and results
- Channel leadership attention to priority efforts
- Transparently discuss measures and results

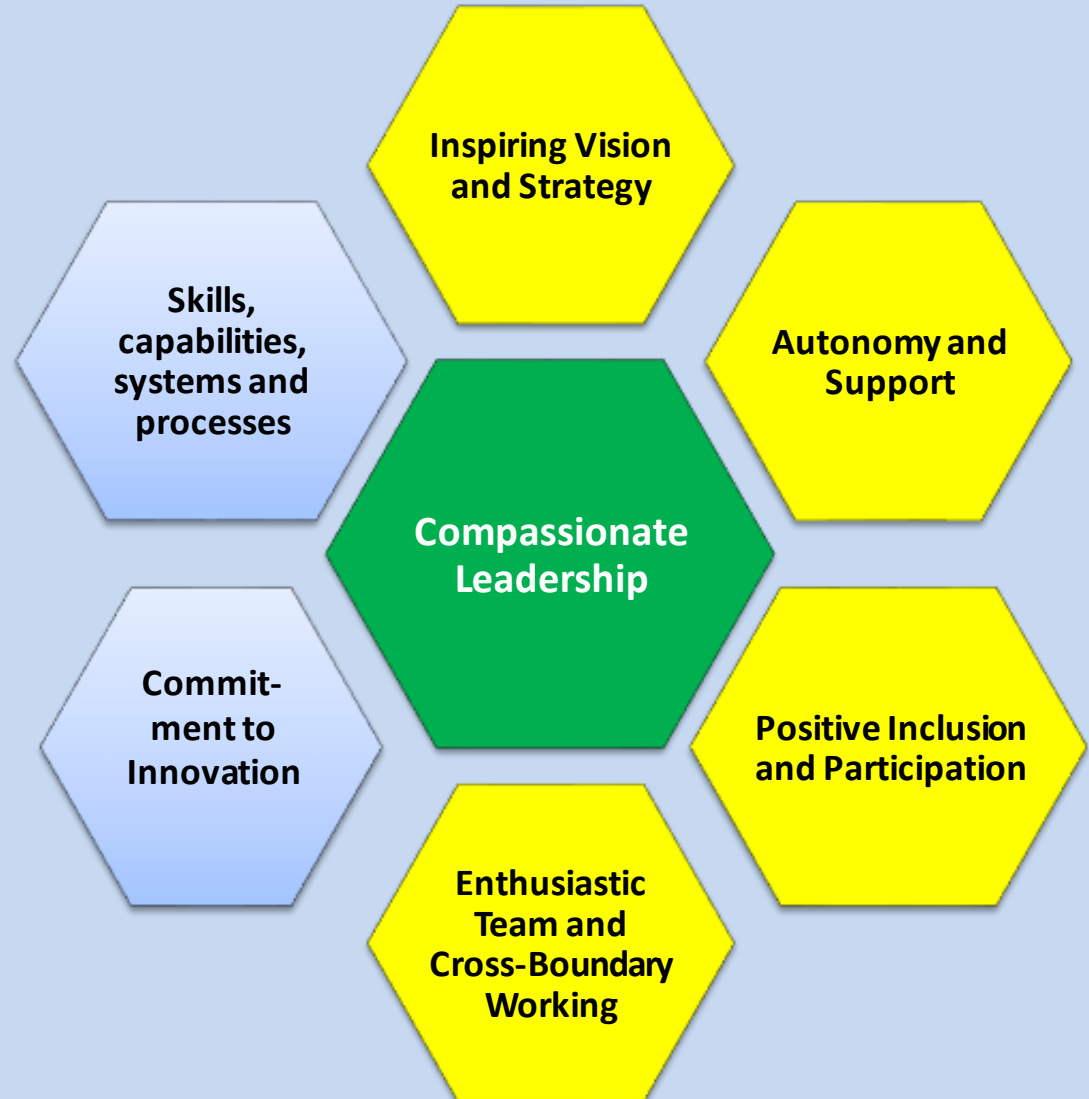

### Deliver Results

- Use proven methods and tools
- Frequently and systematically review efforts and results
- Devote resources and skilled leaders to high-priority initiatives

### Engage Across Boundaries

- Model and encourage systems thinking
- Partner with other providers and community organizations in the redesign of care
- Develop cross-setting care review and coordination processes

# Focus on the solution, not just the problem.....

- Trust teams to tackle problems
- Use improvement methodology as a system tool
- Don't focus on one adverse event (or even one favourable one!)

- Shaping strategy and vision

- Balance

- Sometimes .....Just do it
